I. Purpose: To insure compliance with all clinical agency regulation on immunizations, CPR, criminal background and drug testing by all enrolled nursing students in the Yuba College Nursing Program. This policy's further purpose is to relieve faculty and staff of the obligation to insure clinical compliance.

II. Application: All students will be compliant with all program requirements and the student's Immunotrax documentation prior to the start of every semester. All compliance determinations will be through Immunotrax. Students will refrain from asking faculty or staff to determine or validate compliance.

III. Philosophy: It is the professional duty of all registered nurses and RN students to comply with industry standards for immunization, CPR, criminal background and freedom from impairment.

IV. Policy: Two weeks prior to the start of every semester while in the Yuba College Nursing Program, students will have completed all necessary program requirement updates to clear them for the entire semester. If a student neglects to update the necessary immunizations, CPR, and or drug testing, the student will be ineligible to progress further in the program. **It is the sole responsibility of the student to keep their immunizations and CPR up to date through Immunotrax.**

1. Students will check Immunotrax records at least 3 times during the academic year for compliance with program requirements.
2. The student will adhere to reminders from Immunotrax that they are pending or out of compliance with program requirements.
3. Students will have all requirements met and documented on Immunotrax no later than two weeks before the start of instruction.
4. All program requirements will be renewed in such a manner as to be compliant for the entire semester.
